

Breast & Cervical Cancer Screening Huge Success

On October 12, 2011, Jennie Edmundson Hospital held its annual Breast and Cervical Screening. This year 106 women were seen thanks to a coordinated effort of 7 physicians, 4 mid-level providers, 28 staff volunteers and 4 community volunteers.

The women ranged in age from 28-80, half of them were uninsured and they came from 7 counties in Iowa and Nebraska. 42 of the 67 mammograms generated were made possible through the generous funding of the Iowa Affiliate of Susan G. Komen. One Breast Cancer was found making the entire planning and advertising well worth the efforts.
